Date & Time : 12-07-2024

Name of the Program : World Paper Bag Day

Brief Report :

World Paper Bag Day was conducted under 12-07-2024th. The student has been described as the need of paper bags for students.

Thin plastic carry bags we used to harm the most of the environment. They are working as contributing to water, land and air pollution. The worst dispersion used in the house every day, and the remaining materials will be transplanted in plastic bags. Causing the worst in the dirt drains and people are embarrassing. Eating mooring plastic bags to take their hunger and dying their digestive tract. These plastic bags are stable in the ground and increase the land pollution. To use paper bags instead of. These are together in the ground in a very short period of time. Can reuse by recycling bags of paper. Paper bags will come to work to compost. Paper bags are not harmful to any. The paper is preparing paper by grass, from the remaining pulp materials after the previously taken by the waste of wood, waste, rather than waste, sugar from sugarcane.

The use of plastic carry bags during the World Paper Bag day was stopped by the use of paper bags that would be preparing to protect our environment.
