NEWS LETTER, VOL : 01 JANUARY 2022

ABOUT THE COLLEGE

Sri Velagapudi Ramakrishna Govt. Degree College for Men was established in the year 1971 at Nidadavole.

The College is affiliated to the Adikavi Nannaya University, Rajamahendravaram. The Lions club as well as the people of Nidadavole town donated funds liberally for its establishment. Dr. B.V.L.N.Raju, the founder president of the college committee and Sri Venkata Ratnam, the founder secretary of the college committee strived hard for the sanction of the college. As a result of their hard work and persuasion the college was sanctioned vide G.O.M.S.No 147 Edn Dated 16-09-1971.

At the beginning B.A. and B.Com courses are sanctioned in the year 1971 and subsequently B.Sc courses (MPC &CBZ) were sanctioned in the year 1971 and subsequently B.Sc courses (MPC &CBZ) were sanctioned in the year 1976

B.Sc computer course was sanctioned in the year

2004.

SANKRANTHICELEBRATIONS

On the auspicious occasion of MAKARA SANKRANTHI the Department of Telugu has organized Rangoli Competitions and awarded prizes to the winners Smt. S N D Lakshmi Devi, Dr Ch Yasoda were organised this programme.

POND VEGETATION

Importance of analyzing Pond ecosystem:

Pond Ecosystem refers to a freshwater ecosystem on which different organisms depend for their survival and to fulfill their nutritional needs as well. The ponds are the water bodies that are usually 12-15 feet deep in which the sun rays can reach which results in the growth of plants down there. The components of the pond ecosystem include both biotic and abiotic components. Biotic components consist of producers, consumers, and decomposers whereas abiotic components include organic and inorganic materials. It should be noted that biotic components follow a food chain.

Pond Ecosystem has a great significance. They provide inhabitation to scarce species and support biodiversity much more than any other freshwater habitat. It is home to many species. Ponds work as mini reservoirs which help to drain fields during rain. Ponds recycle the nutrients and reduce the number of nitrates and phosphates.

Student achievement after completion of project (outcomes):

Various Biotic components which include producers, consumers, decomposers and abiotic components which include organic and inorganic materials were observed by students and results were analysed at various levels in pond. They could now able to understand and co-relate abiotic and biotic components of nature and their interdependence is well understood
