GROUP DISCUSSION ON SESSION MANAGEMENT IN PHP

CO-ORDINATOR :
Smt.B.soujanya

Date & Time : 06.09.2025

Name of the Programme : Group Discussion on Session Management in PHP

Program Organizer : Smt B Soujanya , Lecturer in Computer Science

Brief Report :

Objective

The objective of the group discussion was to provide students with a deeper understanding of Session Management in PHP, its role in web development, advantages, challenges, and best practices. The discussion also aimed to improve students' communication, teamwork, and problem-solving skills.

Procedure

- The discussion was conducted for 3rd B.Sc (Computer Science) Major students.*
- A total of 9 students participated, divided into three groups (A, B & C) with 3 members each.*
- Group A explained the concept and working of sessions in PHP.*
- Group B discussed the advantages and challenges of session management.*
- Group C highlighted the best practices for secure and efficient session handling.*
- Faculty guided the discussion and ensured equal participation from all groups.*

Findings

1. Concept of Session in PHP

- *Sessions are mechanisms to store and maintain user information across multiple pages.*
- *Unlike cookies, session data is stored on the server, making it more secure.*
- *Each session is identified by a unique session ID.*

2. Working of Session Management

- *A session begins with `session_start()`.*
- *PHP generates a session ID and shares it with the client (usually via cookies).*
- *Data is stored in the `$_SESSION[]` superglobal until `session_destroy()` is called or the browser is closed.*

3. Advantages

- *Provides security as sensitive data is stored on the server.*
- *Facilitates personalization, such as login credentials, shopping carts, and preferences.*
- *Easy to implement using PHP's built-in functions.*

4. Challenges

- *Risk of Session Hijacking if IDs are stolen.*
- *Session Fixation attacks if IDs are manipulated.*
- *Excessive session data can cause performance issues.*

5. Best Practices

- *Use `session_regenerate_id()` after login to prevent fixation attacks.*
- *Enable HTTPS to secure session data during transmission.*
- *Set session timeout limits for improved safety.*
- *Store only essential information in sessions.*
- *Always end sessions properly using `session_unset()` and `session_destroy()`.*

Outcome of the Discussion

- *Students understood the importance of sessions in PHP.*
- *They gained clarity on the difference between cookies and sessions.*
- *They learned about security threats like hijacking and fixation, and ways to prevent them.*
- *The activity improved students' teamwork, communication, and technical knowledge.*
- *The discussion connected theoretical concepts with practical web application security practices.*

TEACHER'S DAY

**CO-ORDINATOR :
STUDENTS**

Date & Time : 08.09.2025

Name of the Programme : TEACHER'S Day

Resource Person : Dr.K.JYOTHI, Principal

Brief Report :

The Teacher's day was celebrated by the students in our college on 05/09/2023. It was a moment of reflection and gratitude, where the faculty members gathered to honour the profession of teaching. The Principal madam and the senior faculty members delivered speeches and shared their experiences in the teaching profession. They spoke about the challenges and rewards of teaching and the vital role educators play in shaping the future.

The celebration continued with a cake-cutting ceremony by the staff, a delightful moment of unity and festivity. Laughter filled the air as students organized fun games for the staff, creating an atmosphere of camaraderie and joy.

The program concluded with a group photo capturing the happy memories of the day, serving as a memento of the special occasion.
